

Multi-Purpose Liquid Applicator

Abstract of the Disclosure

One aspect of the invention is directed to a method of
applying a liquid to a surface from a wheeled receptacle which is disposed
5 on the surface. The wheeled receptacle, itself, includes a circumferential
sidewall, a bottom wall connected to the circumferential sidewall, at least two
wheels, a steering handle for guiding the wheeled receptacle on the surface,
and a spigot; and the wheeled receptacle contains a liquid. The method
includes the steps of: opening the spigot, thereby dispensing a liquid through
10 the spigot of the wheeled receptacle and onto the surface; and guiding the
wheeled receptacle across the surface via the steering handle, thereby
dispensing the liquid through the spigot of the wheeled receptacle onto a
selected area of the surface.
